

ModalSilk
From LILY&LALI Vol-1

Modal fiber is made of European beeches and then into wood pulp, processed into fibers through the specialized spinning process. Raw materials are 100% natural and harmless to human body. It can be decomposed naturally without harm to the environment. Natural modal fiber has many advantages. It has cotton softness, silky luster and flax-like smoothness. Its water absorption and air permeability are superior to those of cotton. Satin has a smooth and soft texture Modal satin cloth feels soft and has good draping with good dressing effects. Good form stability, natural anti-wrinkle and no need to iron make it dress more convenient and natural. In addition, modal fiber also dyes easily. Most importantly, the modal fiber can be blended with any other fiber. Based on its mentioned advantages, modal fabric is widely used in the clothing production, such as skirt, dress, blouse and so on.
